- Webflow, Squarespace
- HTML, CSS, JS, PHP
- Figma, Git, MySQL, SEO
- Microsoft Office Proficiency
- Basic Audio, Video and Photo Editing

ACHIEVEMENT

- Civil Service
Professional Level
Passer

PROFILE

As a Computer Engineering graduate, I possess a balanced skill set in both software and hardware. On the software side, I have experience in web development using various web builders, specifically Elementor/Pro, and proficiency in HTML, CSS, foundational knowledge of JavaScript and PHP, and SEO for creating dynamic and user-friendly websites.

Furthermore, I am adept at using Microsoft Office applications such as Word, Excel, and PowerPoint, generating project reports and presentations, coordinating online meetings with clients, documenting work progress, performing software installations, and navigating computer systems efficiently.

On the hardware side, I have foundational knowledge of Arduino, electronics, and networking, along with skills in hardware troubleshooting and setup.

With a drive to excel and adapt to diverse environments, I'm eager to contribute my skills and continue growing as a versatile professional in the field.

WORK EXPERIENCE

Project-Based Work

October 2023 - August 2024

Wordpress Developer

- Collaborated with the head developer
- Created a website from scratch
- Utilized Elementor/Pro builder in creating the website
- Integrated various plugins for the site setup
- Turned the Figma Design into a working website
- Ensured mobile-responsiveness
- Applied proper SEO (Search Engine Optimization)
- Handled the site server, files, database, and domain
- Optimized the back-end of an e-commerce website

LANGUAGE

- English
- Filipino

Freelance – Online

October 2023 – June 2024

Search Engine Optimization Specialist

- Optimized website's visibility and functionality
- Identified relevant keywords and phrases
- Enhanced website elements such as tags, meta description, headers, and contents (images, etc.)
- Optimized for mobile-responsiveness
- Interlinking pages

On-the-job Training

July 2022 – August 2022

Assistant Developer

- Worked with a peer on developing a mobile application (TSMFII) mainly for viewing the instruction needed by the manufacture to eliminate the usage of traditional pen and paper setup.
- Utilized 3D Unity for the application development
- Focuses on the user interface graphics and functionality
- Created sprites to enhance the visual look of the application
- Graphic Design
- Presented the mock-up and final output to the panel
